
WOOD PIGEON SUMMER SEASON 2016 NEWS

Season results and weather

We started in last week July with great anticipation, but weather had affected the crops badly

and we had few crop fields to work with and this meant the first group in the door had 1 reasonable day and 2 poor ones ' **To the point you think I could do with a new job**' and as the crop fields came in so did the birds,,, Ok not totally huge days but most guns were taking 25-35 pigeon a day thats fine that's what we want. But on the decoying front 'spinners were not working 'and flappers were barely pulling also. Best results were over floater poles with dead birds and a small pattern of good quality dead birds, I make the clients choose 4-5 good birds for the next day and we ensure they are kept decent over night - weather was very warm all season and birds refused to feed or move in numbers until 3-7pm and most bags were made up of flighting birds early am and very few

**Swedish group of
5 guns spent 3
days for 180 -
156 - 37 ?**

decoyed all season. Ok were now over 2016 and looking to the spring months in 2017. So get booking as we have only 50% of our areas available already. Pigeon has become very popular generally it is a lower cost type of hunting and is proving more popular as the years go by.

If you should like to book contact us we will give our best advise for best chances. **Always.**

Swedish bronze european medalist on Skeet - shot 75 on best day.

We look forward to hearing from you and remember we are agents for many other shoots in the UK.
