
WOOD PIGEON SUMMER SEASON 2016 NEWS

Season results and weather

We started in last week July as normal but as we have a new wood pigeon shoot at Prestatyn in North Wales over a lot of Rape we can start first week of July which saw the best shooting according to the estate keeper wet weather had affected the crops badly and delayed the harvest at Northampton and Leicestershire we had a few crop fields to work with and this meant the first group did fine with bags of 30-50 per day But on the decoying front 'spinners were not working 'as 2016 flappers were barely pulling also. Best results were over floater poles with dead birds and a small pattern of good quality dead birds, Spring hunting

**A very good
spring bag at
Northampton
March 2017**

was excellent over drillings on the beans on all areas with average day bags at 25-30 birds per gun, don't get me wrong we did have a few stinky days with small bags 10-12 bids - and nothing is ever guaranteed in this game. So remember all those big bag pictures you see !!! be realistic and stick to good solid tactics I watched some poor decoying by guns / glasses o tp of heads no face masks - those that went the extra mile all had good results. invest in face mask and gloves to cover hands and head.

If you should like to book contact us we will give our best advise for best chances. **Always.**

Prestatyn above left and above here shoot September just a bit late in this area we were restricted to a few fields due to cultivation.

Small Bag's taken in Northampton 2017 August 2

Call us on 07795-214934 and book early we were manic in 2017 and even now enquiries and bookings are coming in fast so dont be disappointed.
