

WOOD-PIGEON COMING SEASON 2024

The Weather the Crops. 2023

Early March this was best month in spring easily with regular 30 birds to the gun per day in all our areas on average. The crops were then brought in early first week July in Northampton and Midlands areas, affording really good shooting and I thought this has to run out of steam as the months rolled on, and sure enough last few groups through in end September / October were scraping the barrel except in Manchester at Irlam great bags all year long. best bags were 360 for four in Leicester and 280 for 5 in Manchester region. A lot of nearly 100's but not as good as 2 years ago. But Covid limited the year. It got too Warm in the end, meant the bird's didn't need to feed or be specific where they flew to. DIFFICULT YEAR.....
